Compact Mobility

BioFlo[®] 610 mobile SIP fermentation systems

Compact and Comprehensive

The Eppendorf BioFlo[®] 610 fermentation systems – an exceptionally compact and versatile, industrial Mobile Pilot Plant Fermentor with choice of 50 and 100 L sterilizable-in-place vessels for R&D through small-scale production.

This modular system is offered with a comprehensive set of standard off-the-shelf options for rapid initial delivery, as well as easy customization at any time, should your process needs change. The entire system is built-on a mobile skid that fits through virtually any doorway, making it easy to move and share between labs in research, pilot plant and cGMP environments.

Modular design provides flexibility

- > Easily add or remove system components at any time, pre- or post-delivery to accommodate changes in your process requirements
- > Numerous ports in the vessel headplate and sidewall provide flexibility to position sensors, addition valves, pressure transducer and more
- > Multiple gas flow options; choose one or two thermal mass flow controllers, in a variety of flow ranges.
- > A wide variety of options are offered, including SCADA software, spray balls for vessel clean-in-place, redundant pH/ DO sensors

Advanced controller optimizes results

- > Simultaneously regulate up to 32 process loops through the sophisticated RPC (Reactor Process Controller)
- > Create, save, rename, delete and load up to 10 batch recipes to standardize your process and reduce operator variability
- > Trend up to eight process parameters simultaneously on one screen and export process value data for analysis in Excel[®] via the USB port
- > Built-in security features provide two user groups unique userdefined passwords and auto log-out
- > Process scale-up and scale-down are made easier because the same RPC controller is used across our line of bench- and intermediate-scale fermentor systems

The BioFlo[®] 610's intuitive touchscreen interface makes advanced operations user friendly

Trend graphs make it simple to track and export data on up to eight process variables over a six day span

Cascade one or more variables (in this case agitation, gas flow and pressure) to achieve sophisticated process control, based on the value of any other one or more variables

Reduce the time and effort needed to verify vessel integrity through the Pressure Hold Test Screen Integrated system includes control station with touchscreen interface, 50 L or 100 L working volume, and mobile piping skid

Mobile design/compact skid

Optional exhaust gas condenser reduces evaporation of vessel contents

Built-in load cells provide – a direct measure of vessel contents, enabling integrated control of pumps for harvesting or automatic addition

Multiple sensor options for pH, DO, redox, 2nd pH, and 2nd DO are offered

Two foam/level conductivity sensors

Multiple PG 13.5 headplate ports and sanitary connection ports provide the flexibility to position sensors and redundant sensors wherever needed

Resterilizable addition valve array facilitates making sterile additions; each vessel can accommodate up to four addition ports; one addition port shown

Optional glycol heat exchanger enables rapid cool-down; closed-loop, ecofriendly design eliminates need for single-pass cooling water in growth mode

Swing-away headplate makes it easy to access the vessel interior for cleaning

Bottom drive with double mechanical seal and rushton style impeller are standard; low-shear pitched blade and marine blade impellers optional

Adjustable-angle, userfriendly 15 in (38 cm) touchscreen interface

Three built-in, assignable peristaltic pumps

Customizable PI values or factory defaults can be selected for most process parameters

Multiple analog inputs and outputs

Automatic vessel pressure controller

Sanitary fittings allow utilities to be connected in minutes

Resterilizable sample valve

Resterilizable drain valve enables sterile transfer of vessel contents

Safety features include a sanitary rupture disk in the vessel and an ASME safety release valve on the drain jacket
