

RH-18/RH-18+ 3D Rotating Mixer

Rotator, Mixer and Vortexer

Introduction

3D Rotating Mixer is a uniquely designed instrument which can mix samples by horizon, vertical and any angled rotation with a variety of sample tubes. It is widely used in molecular hybridization, blood and other samples that need to be mixed.

Feature

1. Unique combination of adjustable rotating frame.
2. A variety of rotation modes, from mild type to somersault type rotation mode.
3. Widely used in molecular biology, histo-chemistry, bio-chemistry, clinical applications, etc.
4. Provide three types of rotating frame.
5. RH-18: positive and negative rotation just gently press the rotating frame when instrument is working.
6. RH-18+: with reciprocating oscillation function from 20 angle to 99 angle.
7. Oil-free bearings are built in both ends of the bracket.
